

Thomas Group provide Wakefield Council continual improvement using Diesel 1000 Fuel Additive

7.8% Fuel Saving

Results from the 3rd quarter of the Wakefield Council Diesel 1000 Fuel Additive program continues to show further improvements. Over 9 months the six bulk storage sites have been additised with Diesel 1000 Fuel additive, treating over 1 million litres of fuel which supply the 500+ vehicle fleet with nearly 30,000 fill-ups.

Based on accurate data from Assetworks fleet management software, fuel usage has been increasingly reduced starting at 2.12% at Q1, 4.8% end Q2 and now a reporting fuel saving of 7.8% in Q3 (at the same time fuel prices have risen by over 7%).

The benefits do not stop at fuel savings, during the same period the fleet maintenance costs on EGR & DPF reduced by 80% and 100% (all vehicles) selected from the fleet at random showed a reduction in emissions.

Nett savings to date is approx 4.4p per litre of fuel, for any fleet in any industry this saving alone is significant, add this to the maintenance and environment benefits it makes sense to invest in a Diesel 1000 program.

Pete Johnson, Service Manager for Transport Services Wakefield Council, commented: (October 2018)

"The trial has given very positive results and fuel savings based on robust data. This, along with the reduction in emissions, means the trial was a resounding success."

Long-term continual use of Diesel Additive will also add further benefits. Improved engine performance will be gained as the high-quality additive will remove the build-up of internal diesel injector deposits (IDIDs) to protect against power loss and even restore lost power over time. Furthermore, by providing constant lubrication, Diesel Additive has been proven to extend the life of engine components by protecting against the degradation of the fuel injection system. In doing so, vehicle operators can expect reduced maintenance costs, protect their fleets and maximise the return on their investment.

For the premium choice in fuel additive, select FuelBright Diesel Additive for your fleet today. Can you afford not to?
